About Avalis

Avalis, a Colorado-based corporation, is **the interior sign company** that specializes in changeable, functional wayfinding solutions that improve hospitality and aesthetics for clients and visitors at public facilities.

Since 1989, Avalis Wayfinding Solutions, Inc. has been helping ensure successful journeys. A well-planned, quality wayfinding solution helps visitors find their destinations quickly, improves accessibility and even saves lives by leading people to the nearest exit during an emergency.

Avalis is the company who will handle all of your sign projects large and small from the beginning designs to the ongoing maintenance for as long as you have your sign system.

Our modular sign system is pre-engineered to be fully changeable. It is used extensively in a range of facilities, from hospitals to office buildings.

When you choose Avalis, you receive wayfinding solutions that meet your specific needs and help your visitors feel welcome and comfortable. You'll have a sign system that:

- Features enduring structural integrity
- Is competitively priced
- Aesthetically complements your décor
- Is unique to your facility
- Can be updated when you remodel
- Saves you money now and in the future

Superior Service that Keeps Up with Your Organization

Your organization is growing and evolving. At Avalis, we understand what it takes to properly maintain an interior sign system, and we're prepared to update that system as frequently as your needs change. We value a long-term relationship with you. We're ready to take care of your needs for years to come by providing a beautiful, correctly maintained sign system that will keep pace with the change in your organization.

Online Reordering

Not only can you review and approve project designs and message schedule online, but once your sign system is installed, you'll have access to our easy-to-use online reordering site to obtain ongoing customer support. You can log in to your own password-protected page that includes pictures and dimensions for easy visual reference so you can easily recognize your sign types. You'll be able to reorder complete signs or replacement inserts.

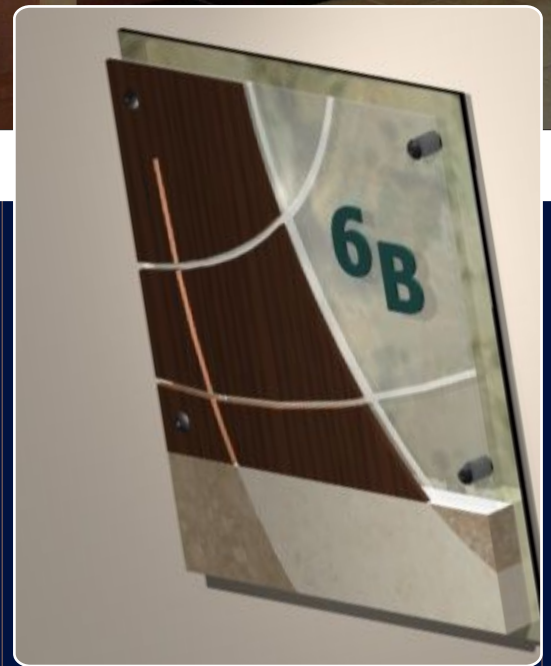

Our Custom Design Process

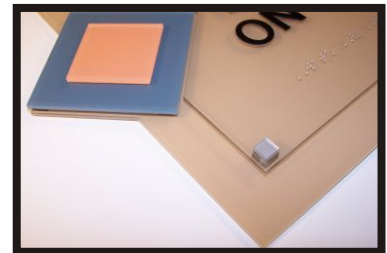

- **Needs Assessment:** We ask you the right questions so we can learn about your wayfinding issues and the flexibility you require.
- **Comprehensive: Wayfinding Analysis** This enables our team to gain in-depth knowledge of your needs and to deliver impressive solutions.
- **Product Design:** Once we understand your needs and preferences, we design products that direct your visitors effectively and enhance their experience in your facility.
- **Project Management:** We work closely with you to manage your project and ensure timely completion.
- **Unique Solutions:** Our sign systems are designed to match your one-of-a-kind facility.
- **Productive Partnerships:** We can manufacture wayfinding designs created by your architects and interior designers.

The Custom Series

“We’ve spent a lot of money on a Class A facility. We’re not looking for a standard product; we want a unique sign system that complements our interior finishes - dynamically.”

The Custom Series

The Custom Series is just that; we manufacture the designs of a design firm or we design a system that is unique to a client's facility .

Materials, colors and textures are virtually unlimited!

The Custom Series

The Custom Series is specifically designed for the customer who wants their own unique "signature" incorporated into their signage system.

The choices of material and hardware are literally limited only to the imagination.

If your building is architecturally unique, our team of designers can comprise a sign system for you that is coordinated with the architects' vision.

INSTALLATION INSTRUCTIONS

Drywall / Latex paint:

Light-weight signs up to 9" x 9" - 3M VHB double-sided tape only - **AND Silicone.**

Larger Signs + Heavy Signs:

Premount 1/8" thick backplate to the wall with Flathead Drywall Screws & then adhere sign to backplate with 3M VHB double sided tape or black foam tape - whichever tape adheres best to back of custom sign material.

Vinyl Wallpaper Applications:

Light-weight signs up to 9" x 9" - 3M VHB double-sided tape only - **AND Silicone.**

Larger Signs + Heavy Signs:

Premount 1/8" thick backplate to the wall with Flathead Drywall Screws & then adhere sign to backplate with 3M VHB double sided tape or black foam tape - whichever tape adheres best to back of custom sign material.

Concrete / Brick / Concrete Block:

Light-weight signs up to 9" x 9" - 3M VHB double-sided tape only - **AND liberal amounts of Silicone.**

Larger Signs + Heavy Signs:

Premount 1/8" thick backplate to the wall with Flathead Screws & anchors then adhere sign to backplate with 3M VHB double sided tape.

Glass:

3M VHB double-sided tape only. **Glass backers** should be identified in advance and applied to the back side of glass to hide tape attachment from inside a room.

Mechanical Fastening:

Where **MECHANICAL FASTENING** is required, anchors, screws and tape will be used for pre-alignment and additional security - unless the company is told specifically not to use tape for any reason.

Preferred installation method varies depending on the mounting surface and sign type. Installation method will typically follow applications shown at the left.

	Project Reference:	Status:	Date:	Designer:	Customer Approval:	Sign Type:

	Contact:				Approved By:	
	Sales Rep:				Approved Date: 7/7/2005	Scale: Not to Scale
					Customer approval is required prior to production.	

ADA Compliance

The Americans with Disabilities Act (ADA) requires the use of lettering with a minimum raised height of 1/32" and Grade 2 Braille for identifying permanent rooms and spaces. Directories, directional signs and informational signs are specifically excluded from the Braille and raised text requirements. However, these types of signage must meet certain other ADA requirements, including minimum color contrast between text and background, non-glare finishes and text size relevant to viewing distance.

An Amazing Selection of Beautiful, Low-maintenance Colors

We offer you the widest selections of standard colors available in sign systems. You can choose from over 75 warm, inviting colors so you're certain to find a match for your interior finishes. Our deep, beautiful colors will complement your décor and help you create a comfortable environment for your visitors. The sign systems we offer keep their sharp appearance longer than ordinary signage. All of our standard-colored acrylics require no painting. Because our signage features colors that are either on the second surface behind clear acrylic or integrated into the material, there's no chipping paint to detract from the visual appeal of your facility or create additional maintenance needs, and scratches from ordinary wear won't reveal a secondary color. When you need to change inserts, you'll be assured that colors will be consistent, and our acrylics won't fade like paint, so you won't have color matching problems in the future.

IN ADDITION TO ACRYLICS: We can build your complete sign system from materials such as hardwoods, glass, laminates, decorative tiles as well as sustainable materials and custom color acrylics.
